2018 –present Kalyani, India	**Kalyani Govt. Engineering College,** *B. Tech, CSE*
2016 – 2018 Kolkata, India	**B.T. Road Govt. Spons. H. S. School,** *Class 12*
2006 – 2016 Kolkata, India	**Baranagore Ramakrishman Mission Ashrama High School,** *Class X*

SKILLS

HTML5

HTML i.e. Hyper Text Markup Language, used for Web Design and Markup

Javascript
Javascript is the language used for making the dead webpages interactive and alive, without javascript the web is incomplete

Angular 7
Angular 7 is another popular front end framework for web development

Flask
Flask is another python based web framework for backend development

MongoDB
Every backend developer needs a database to connect with, Mongo is my goto option for that

C
C is not much used except of school/college syllabus and arduino development

CSS3

CSS i.e Cascading Style Sheet is used to make webpages beautiful

ReactJS
A frontend framework for creating webpages

Django
Django is a python based backend freamework used for web development

Express.js + Node.JS
Express and Node is a deadly combo for backend development

MySQL
Alternative to MongoDB if needed, but not proficient with it

Python3
Python is a powerful programming language for task automation and web development. It can also be used for ML, but I'm not too much into that

PROJECTS

10/2019−Present	**Adben Industries Pvt. Ltd. Website,** *https://adben.in/* I worked as a frontend developer at Adben Industries Pvt. Ltd. To develop their website. Django was used for backend and Django Template Engine is used for the frontend.
01/2019−03/2019	**QuotesApp,** https://ayushmanbilasthakur.github.io/QuotesApp/ QuotesApp is an app which has a frontend as well as a backend and both are developed by me. It uses MongoDB as database, Flask at the Backend And it an Angular 7 app
09/2018−11/2018	**Noticeboard-prototype,** *https://ayushmanbilasthakur.github.io/NOTICEBOARD-PROTOTYPE/* Using Firebase as the backend this app was developed for the qualifier round of a competition
09/2018−10/2018	**HANDY-WRITER,** *https://ayushmanbilasthakur.github.io/HANDYWRITER/* Using marked.js this app converts your markdown to HTML and Rich Text File
08/2018−09/2018	**Bookmarker App,** *https://ayushmanbilasthakur.github.io/BookmarkerApp/index.html* This app uses Bootstrap as a CSS framework and localstorage is used for storing your bookmarks, nice and handy app built with the help of a tutorial online
08/2018	**Number Fact,** *https://ayushmanbilasthakur.github.io/number-facts/* Using numbers api available online this app was built
08/2018	**TEMPConverter,** *https://ayushmanbilasthakur.github.io/TEMPConverter/* Convert temperature using CSS and JAVASCRIPT and HTML
